PROJECTS

Rental App [PHP - Laravel - Vue]

Rental management system developed to help manage apartments. This system has the capabilities of a multi-tenant system. One can register several companies as they wish. The system can track rent and expenses incurred in a specific apartment. visit <https://umojarealty.com/>

CloudHR System [PHP - Laravel - Vue]

Developed an extensive human resource system. That can perform most of the tasks undertaken by a Human resource person. The application has features like leave, loan applications, recruitment, notices, memos, document approval and many more. visit <https://cloudhr.biz/>

Lets Meet [PHP - Laravel - Vue]

This application solves the problem of taking minutes and compiling them. Users can have a meeting and everyone takes notes on the application. When the meeting ends the record keeper will proofread and compile the minutes then send them to individual approvers to finalize the minutes.

EDUCATION

PIONEER INTERNATIONAL UNIVERSITY

- Bachelor of science and information technology

MICROSOFT TECHNOLOGY ASSOCIATE

- Database Administration Fundamentals
- Introduction to programming using python

WORK EXPERIENCE AND RESPONSIBILITIES

I have 5 years of experience in development and Design. I have used tools like Figma for design and prototyping, then brought the designs to life with HTML, CSS(tailwind/bootstrap), javascript (vue) and PHP (Laravel)

I have been in a position to manage a group of 5 people. This is a role that I was given after showing consistent progression and trust to my employer.

Some of the responsibilities I have in my current job are:

- Project manager
- UI / UX Designer
- Frontend developer
- Backend Developer
- Team Supervisor
